

ZONTIK

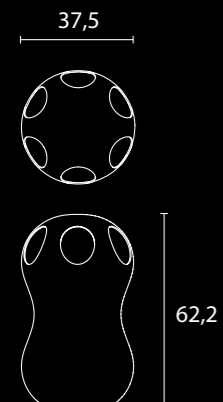

design Karim Rashid
2006

Portaombrelli.

Zontik, unico per servizio e funzionalità, mantiene l'ordine razionalizzando i contenuti. Dotato infatti di sei appositi fori, raccoglie e trattiene l'acqua che gocciola dagli ombrelli mantenendo asciutto il pavimento. Il portaombrelli Zontik è realizzato in polietilene tinto in massa ottenuto mediante stampaggio rotazionale. La parte esteriore è disponibile in due finiture: verniciatura protettiva opaca o verniciatura lucida.

Materiale:
Polietilene.

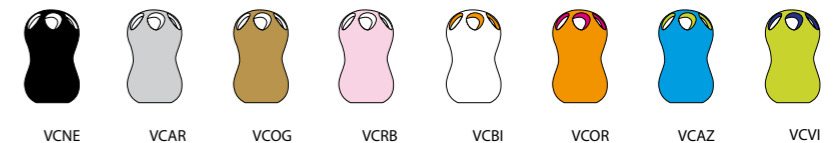

p. 8-9

Umbrella stand.

Zontik, proud of this service and functionality, maintains organization yet also displays the contents. Zontik offers six umbrella apertures and diligently collects and contains any water that may drip from wet umbrellas in a threat to spoil other interiors. The Zontik umbrella stand is produced in polyethylene and solution-dyed by means of rotational moulding. The exterior is available in two finishes: opaque protective paint or polished paint.

Material:
Polyethylene.
